Parámetros y argumentos

```
// No muy bien
```

```
function sendEmail( toWhom: string, from: string, body: string, subject: string, apiKey: string ): boolean {
```

```
interface SendEmailOptions {  
    toWhom : string;  
    from    : string;  
    body    : string;  
    subject: string;  
    apikey  : string;  
}
```

```
// Mejor  
function sendEmail({ toWhom, from, body, subject, apikey }: SendEmailOptions ): boolean {
```
